

XDCAM Decks

Sony PDW-F70 XDCAM HD

Call for Rates

The PDW-F70, XDCAM recording deck, features MPEG HD recording with DVCAM material playback compatibility. It is capable of recording 1080 video lines of multiple frame rates at a high bit rate of up to 35 Mbps on Professional Disc media. It also provides four channels of high quality uncompressed audio.

The PDW-F70 deck records and plays Professional Disc with HD material at 1080/59.94i, 50i, 29.97P, 25P and native 23.98P using the "MPEG HD" codec. And for high quality sound, four channel, 16 bit, 48 kHz uncompressed audio is used.

The deck will up-convert playback of DVCAM material to HD signals and output via HD-SDI or the HD analog component connection. It will also down-convert MPEG HD material to the SD SDI or composite connection while outputting DV via the i.LINK (firewire) interface.
