

Bridging Amplifiers/Transformers

Shure FP-12 Bridging Amplifiers
\$10/Day
\$30/Week

The Shure FP 12 is a battery-powered amplifier designed to accept a microphone or line-level signal, bridge it, and produce a signal sufficient to drive headphones at very loud levels. It is ideal for anyone in the broadcasting, sound reinforcement or audio recording fields who has a need for headphone monitoring or checking microphone or line-level cable runs.
